Toilets Making the Grade® School WASH Competition

The Toilets Making the Grade® (TMG) methodology was developed by the German Toilet Organization (GTO) and adapted by GTO and GIZ's global programme Sanitation for Millions in cooperation with local partners in Uganda and Pakistan.

Toilets Making the Grade (TMG) is a school-contest framework aiming at activating school actors to improve their school's sanitation and hygiene situation with minimal external input. It triggers teamwork between management, administration, parents, pupils and maintenance staff through a provided tool set (inspirational package) that allows self-analysing the situation and developing and implementing improvements with their own means.

TMG case study from Uganda
